

I am an ambitious and motivated individual with experience gained through self-training. I am an influential team player with innovative ideas and possess a creative problem-solving ability. I am a fast learner and have a track record of producing high-quality, clean code. My successes lie in developing innovative solutions for Windows applications and client-server platforms. I am proficient in both Windows and Linux and have a keen interest in various technologies.

Work History

04-2023 - present	Junior software developer <i>Mosaico, Cracow</i> <ul style="list-style-type: none">I have gained hands-on experience in database design, management and optimization, including relational databases such as SQL Server and cloud database solutions on Azure.I am experienced in configuring, managing and deploying solutions in cloud environments, especially Microsoft Azure.I am skilled in developing clean code, solving problems and implementing innovative solutions using C# language.
05-2022 - 04-2023	Electromechanical Technician <i>Apleona, Cracow</i> <ul style="list-style-type: none">I regularly worked in teams, which allowed me to hone my communication skills and effectively interact with other professionals to achieve common goals.My work required precision and meticulousness. I always tried to perform tasks with the utmost accuracy, especially in matters of safety and technical standards.In an electrical environment, I am usually exposed to working under high voltage and often stressful situations. As a result, I have acquired the ability to work effectively under pressure, remaining calm and making quick decisions.In my work, I often encountered difficult and unusual problems that required quick and creative solutions. I gained the ability to think outside the box and find innovative solutions to difficult electrical tasks.

Certificates

03-2023	ITS HTML and CSS
03-2023	ITS Information Technology Specialist in Networking
03-2023	ITS Software Development
04-2023	Azure Fundamentals

Education

09-2022 - present	Applied Computer Science, engineer <i>WSEI, Cracow</i> Link : https://github.com/filipkus03/Back-End-Portfolio/tree/master This is a one-day project demonstrating my skills in combining and creating SQL with C# in an application
